## Customer Reviews

I've been looking for a good "Spanish for beginners" book for a long time. I bought *Practice Makes Perfect Basic Spanish* (Practice Makes Perfect Series) for that purpose, but you can read in my review of that book why it wasn't sufficient. But now I finally have a good book for beginning Spanish. The book is called *Getting Started with Spanish* by William Linney and Antonio Orta. The book teaches you what you would typically learn in a Spanish I class in high school or Spanish 101 in college. But what makes this book different from other books is that the lessons are divided up

into manageable "bite-size chunks." Each lesson gets a little more elaborate than the previous one. The authors have bent traditional ways of teaching Spanish. For example, the infinitive isn't introduced until later in the book. But you learn how to conjugate the three conjugations before then. Instead of teaching the forms of "hablar," the author teaches the forms of "yo hablo." So the "yo" form, or the 1st person singular form is used as the semi-infinitive form. When I saw this method of teaching Spanish verbs, I realized that you don't really need to know the infinitive form anyway, at least not until you learn modal verbs like "querer" and "necesitar." The authors have even supplied free mp3 audio files on the book's website. You can download the entire zipped folder from [gettingstartedwithspanishDOTcom](http://gettingstartedwithspanishDOTcom). Or you can download each mp3 individually. The format of this book is unique and quite possibly a revolutionary way to introduce new languages. It makes me wish I had thought of it first.
