## Synopsis

Could a pair of tattoos ignite a passionate romance? Technical analyst Garrett Jones lives a solitary life. Occasionally, he must venture into the outside world to get what he needs. On one such occasion, he finds himself at a local tattoo shop getting inked for the first time with a semi-colon as a reminder of his past--a past he cannot allow himself to forget. Fun-loving and outspoken Dev Hemingway is a social worker for a local LGBTQ shelter. He's covered in tats, has long hair, and though most people think he belongs on a Harley, he prefers his Venom electric scooter. He's adding a semi-colon to his tattoo repertoire to mark eight years since his mental health diagnosis. Though they start seeing each other casually, Garrett and Dev's relationship soon deepens into something more than either one could have prepared for. But will the illness that brought them together ultimately be the one to tear them apart? Could this be the end of their story, or is there still too much left unfinished?

## Customer Reviews

We all know how important discussing mental health is, we all know of the stigma that comes along with those diagnosis's but what, in my opinion, is one of the other major factors that lends to that stigma is the lack of knowledge of mental health diagnosis along with the empathy that can come

from truly understanding the effect it has on someone's everyday life. Although the rarity of these types of stories being written in this genre is becoming less and less it is still rare enough. And Unfinished is one of those stories that opens up the door to that world and truly gives us a glimpse to what life with Bipolar Disorder is truly like; how it alters Dev's everyday life and thoughts and how someone else having bipolar can affect our own lives like it did for Garrett. I connected so much with Garrett from the first page to that last, he captured me. He struggles so much with the past and getting through hurts that he distances himself from friends and life in general. It's funny how the things we go through in life change how we handle our life and for Garrett he stopped being able to live spontaneously; life for him was now planned to the final detail. In some ways Garrett finds it safer to be the way he is than to change so when he meets and finally hooks up with Dev he never foresaw things needing to change because it was a one-night thing, casual. But life has a way of throwing in those wrenches when we least want them. Dev... What can I say I loved him so much! He is this bad boy looking guy who drives a scooter and has a heart of gold. Although we know he is the one with the bipolar depression he is not the one that struggles the most in this book. Dav is outspoken, forward, funny, loving, and happy. He is also very aware of his limitations and his disease.

I was given this book in exchange for a honest review so here it is.....This was an awesome book, giving insight into the lives of people who suffer from Bipolar disease/depression as well as those who love them. The story line was strong and incredible. The characters were well developed and amazing. The main characters, Garrett and Dev, have been attracted to one another from the first time they met at the Tattoo parlor. Garrett was having a semi-colon tattoo applied to signify his past unfinished relationship to a man who had bipolar disease. The man was charged with illegal gambling and money laundering, sentenced to prison for 7 years. Garrett was greatly affected by this thinking it was his fault that he hadn't addressed the change of behavior in the man he thought he loved. Over the course of the last 3 years, Garrett stayed to himself, staying away from his family and others. When he met Dev, the two got together on a one night casual basis.. When they both realized they wanted more, getting to know one another, Dev confided in Garrett telling him of his past with his suicide attempt and the bipolar depression he would always have, even though he was well controlled with meds. Garrett, one night struggled with the fact that Dev could change one day like his ex did, so it led him to break it off with Dev, crushing both of them. Garrett had unfinished business with Pierre (his ex) and decided it was time for apologies and closure. He started to talk with his ex in prison and the healing process began for both. Mental health is sometimes a difficult

thing for people to overcome in their lives and the lives of people they love.
