## Customer Reviews

This has been a long-awaited book for educational psychology students and educational psychologist. It is practical and the guidelines and examples make report writing a pleasure.

I work in the ABA field and this helped further my report writing skills and opened up new ideas and way of thinking when writing. It really does help you write more like a "Professional". If you want to

further improve your writing skills, this book is for you.

This is a must have reference book. If you are new at writing reports, this book will give many brilliant ideas as to how to go about it. On the other hand, if you have been writing reports for a long time and may feel tired of the same, you will find that this book is full of ideas, terms, and different ways of saying what you want to say. I really loved it! It was everything I was expecting.

I'm not sure why this is titled the CC's Report-Writing Handbook, when it helps with so much more than just report-writing. It's a GREAT tool for clinicians because it offers wonderful writing suggestions (e.g. descriptions of appearance, personality, engagement) along with quick-review summaries of the DSM codes and psychoeducational assessments, plus more. I am so glad my advisor lent this book to me - I had to get my own copy!

This book has wonderful templates for structuring a psychological evaluation or assessment report. It will save you a lot of time, and will help you use client-friendly language. highly recommended

I am so glad I purchased this book since it is such a useful handbook which provides both exhaustive coverage of areas for clinical inquiry and really neat forms which can be used in clinical setting. I would recommend this book especially to students about to start their clinical internship. For what you are getting, I would say this book comes with a very reasonable price.
