i recently took a real estate course and the textbook required for the course was ok but i did not feel prepared enough to take the exam. i decided to check .com for a book on real estate that was easier to understand and include a more detailed glossary. i chose the barron's edition and it is written with principles applicable to any state, includes an excellent glossary and is way easier to understand. for my money, barron's was an excellent choice. maybe some day barron's will publish an edition specific to each individual state.

I took this out from the library, glad I did. I've already gone through a few other study books for the

salesperson exam for real estate and I also double check facts. I've only read half of this book so far, and I've done all the chapter quizzes up till chapter 11. I really like the length of the end of chapter quizzes- though sometimes the questions WEREN'T covered in that chapter. Even stranger than that is when the questions sometimes are about things that are far, far from the chapter content. Random things, like lead paint questions in the deed chapter and support beam questions under leases. I've noticed sometimes that information is WRONG. That's just scary. Example, a net lease. Per chapter 10 that would have the tenant paying insurance- but that's not correct. There were a few other things that were wrong, too. I also like how the definitions are in front of the book for easy access. Take this with a grain of salt.

Excellent resource for studying for the broker's exam. The book is clear and has many practice questions/exams to help gauge your progress in understanding the material.

very thorough and complete review. will be keeping this one my shelf long after i begin investing. better than the original textbook i used to get my license. only weak point was the math chapter, still 5 stars. id def buy this again, esp for 13 bucks

So far this has been a good buy. I'm currently studying for the exam and though there is a lot of text to go through, the study questions at the end of the chapters do help. I mainly use it for that purpose. I have noticed a few typos and the print is pretty small for my taste, but other than that, it has been pretty good. I still recommend using other texts and prep exams online and, of course, your study notes. Good luck!

Though the item was not for me it got very high remarks. Very satisfied. Barron's is a standard. Only tip I checked on was publication date as this seemed important with all the legal changes.

Barron's Real Estate Exams 9th Ed., met my expectations, and more. It is precise, and full of hints on how to study for, and pass the California Real Estate Exam.

This book was not accurate to the California real estate salesperson exam. I read it cover to cover and created 1600 flash cards and virtually none of it applied aside from a couple definitions such as littoral rights. Well organized and I learned a lot, but this book was not the reason I passed. 2 stars for lack of exam material coverage.
