Customer Reviews

I took my test yesterday, and I feel very confident that I did well. I followed the guidelines of this book and took all of the practice tests. This is the best study guide I've ever used, and I know it made all the difference for me. This is the only book I used to study, and by the last practice test I was in the 90th percentile. I highly recommend it!

Some say that the MAT is a test that you cannot "study" for. And this may be true, but only to a point. Because the MAT is so broad, you cannot possibly work to know what is on the test. The best that you can really do is prepare yourself to take the MAT with a guide like this one. I just took the MAT earlier today and feel that I did very well. My initial reaction after the test was that the practice tests included in this book were actually more difficult than the MAT itself. I credit this book in helping me to be well prepared for the test. I know for sure that reading/using this book has helped me to achieve a higher score than what I would have gotten on my own. Another reviewer noted some errors in the text, and here is one more: the Saffir-Simpson scale attributed in the text to earthquakes is actually used for Hurricanes. Aside from some small inconsistencies like the one above, I do feel that this book helped tremendously in familiarizing me with what to expect on the

MAT. The book itself consists of study lists and content areas to concentrate on - and these will give you a decent amount of information that may appear on the test. But, the real leap forward (for me anyway) was in the practice tests themselves. In taking the tests you obviously get excellent practice in working with the analogies. On top of that, my own gains were found in reviewing each answer to the practice tests (even the correct ones). First, you get an idea of how well you are doing. And second, by reading each answer you get even more material related to each subject area than is included in just the study lists. I'd highly recommend this book for MAT preparation. The cost is more than reasonable and the benefits for me have been certainly tangible.

I used this book exclusively for my preparation for the MAT, and got a reasonably good scaled score of 457 on my first attempt. The test taking tips and practice exams are great. I found that only about 10 or 15 percent of the subject matter contained in the guide was actually on the exam, but that's probably true of all MAT prep guides considering the broad subject matter from which the test questions are drawn. All in all, I would certainly recommend this book to anyone taking the test.

I purchased a few books to study for the MAT's and quickly realized that this book was the most useful. Unlike other books, this book provided strategy, a manageable amount of information (as opposed to the hundreds of pages found in other books), and a non-distracting layout. The MAT's are daunting because there is a seemingly endless amount of knowledge covered on the test, but this book allowed me to hone in on the pertinent information. The practice tests were extremely helpful and had a lot of the vocabulary I encountered on the actual test. I wanted to note a few errors that I found in the book. Please do not let these errors deter you from purchasing this book--the other 3 MAT books I purchased had many more errors. I am simply listing the errors as an aid in studying the correct information: 1) Page 46, # 108 has an equal value for Celsius and Fahrenheit 2) Page 225, # 41 caliper is written when caliber is meant 3) Page 226, #52 Franklin Roosevelt's program was the New Deal, not Theodore Roosevelt's. I took the MAT as an alternative to the GREs because standardized testing is quite difficult for me. With the help of this book, I scored in the 97th percentile. I recommend it for anyone taking this test.

This was a great book to prep for the MAT. It's easy to understand and a great review of all the bits of information that you forget over the years.

Book was priced fairly. Was the most updated edition. Took the test; had above average score (alot

of people do not pass this test first time); was "unconditionally" accepted to graduate school.
COULD NOT HAVE DONE IT WITHOUT THIS STUDY GUIDE....

Ok, I usually do not review my purchases, but I have been out of college since 1995 and decided to finally go to grad school. I knew I'd need some serious review so I researched many study guides. This guide gives a thorough review of everything that you need to know. There were actual items on my MAT that were in this book. I was so nervous about taking this type of test when I got this book, but after studying it, I found that it was like a game trying to beat my practice scores. I scored in the 95th percentile. I do not think I would have scored so well without this guide. If it can help me, it can help anyone!

I just recieved my scores for the MATs and was really pleased with them. I wanted to write a glowing review for this book right away! Between the pre-tests and the study guides nothing caught me off-guard when I got to the actual exam. In fact, the only criticism, which actually worked in my favor, was that I found this book's tests more difficult (referencing more obscure knoweledge) than the acual MAT I took. I think it's a generally well-written and researched guide. The intro. is actually quite witty and entertaining, and the authors certainly appreciate the antiquated and often frustratingly broad-based knoweledge required for the MAT. It's the only guide I used and I think it really gives you all the tools you'll need for this beast of a test. Good luck!
