Taking Sides: Clashing Views In Drugs And Society

Synopsis

Taking Sides volumes present current controversial issues in a debate-style format designed to stimulate student interest and develop critical thinking skills. Each issue is thoughtfully framed with an issue summary, an issue introduction, and a postscript or challenge questions. Taking Sides readers feature an annotated listing of selected World Wide Web sites. An online Instructor's Resource Guide with testing material is available for each volume. Using Taking Sides in the Classroom is also an excellent instructor resource. Visit www.mhhe.com/takingsides for more details.

I bought this book because it is a requirement for the course I'm taking. This is definitely necessary for anyone taking a substance abuse courses or rehabilitation counseling. This book gives an insight on the pros and cons on certain issues with regards to substance abuse/dependence or behavioral issues.

While of course in all things drug policy the Republicans have had their chance to fight the "War on Drugs" and lost on every front. These arguments put statistics and studies with common sense if you have it and preach tolerance, parenting, possible college classes in order to get your license to drink (my great idea) after the age of 18 since on college campuses and off they are binge drinking

and playing other irresponsible drinking games that could get them killed. Why not force them through a semester of facts and figures, horrific pictures of puking and strapped to a gurney and collisions with peoples's head's cut off. It happens. Don't sugar coat it. Make it an enjoyable class not like the drunk driving class for DUI's. I am sure their are professors eager to put together these types of programs for college campuses instead of finding dead co-eds from alcohol poisoning. Great talks about the rationales of drug policies of other countries and how they do not increase drug use by decriminalizing or even legalizing soft drugs. Overall, it has great debates although the liberal view always makes the most sense when compared to the global world we live in. I must read for psych, sociology, criminology, and other social science majors to put what we have been taught by TV, government into perspective. GREAT BOOK. A+

Very biased book that I was forced to buy for one of my classes. If you have to buy it I feel bad because this author should not get any money for this book. If you aren't forced to buy this then please don't.

This book was required reading for a class or I would have tossed it in the trash much sooner. Pure drivel. Not current, poorly written, & "discussions" used as a time-killer in class by less mature students. My consolation here was receiving an A in the course. Sure, I'd like to get some cash back from reselling it, but I'd be happier if I could convince professors everywhere to quit wasting valuable classroom time with this garbage. Much better works are available.

I had to buy this for a class at USD. I only opened it twice during the semester and still made an "A" in the class.

The book is for a class at wccd and has proven to be a very good tool to learn from. Thanks for your website Denise

I did not like the fact that it has a large black circle on the cover stating that it is a used book. Why couldn't you put it at the bottom or on the side of the book instead of in the middle covering up the name of the book. You can't remove it either. It looks very tacky.
