# MathXL Standalone Access Card (6-month Access)

## Synopsis

ALERT: Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a CourseID, provided by your instructor, to register for and use Pearson's MyLab & Mastering products. Packages Access codes for Pearson's MyLab & Mastering products may not be included when purchasing or renting from companies other than Pearson; check with the seller before completing your purchase. Used or rental books If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code. Access codes Access codes that are purchased from sellers other than Pearson carry a higher risk of being either the wrong ISBN or a previously redeemed code. Check with the seller prior to purchase. --

## Book Information

Misc. Supplies

Publisher: Pearson; 1 edition (November 12, 2012)

Language: English

ISBN-10: 0321878353

ISBN-13: 978-0321878359

Product Dimensions: 8 x 0.2 x 10 inches

Shipping Weight: 1.6 ounces (View shipping rates and policies)

Average Customer Review: 4.4 out of 5 stars See all reviews (46 customer reviews)

## Customer Reviews

I really like MathXL. This is my second time using it. The first was to supplement an on campus course with online homework completion. The second time this semester is for a 100% online course. It's definitely worth mentioning that the campus bookstore charges an arm and a leg, so it's much cheaper to buy here. The program is great though. It includes lesson videos, online homework assignments (complete with tutorials, and learning aids), and online exams. You know your scores instantly. Everything is really easy to use, and as a person who doesn't love math, it's been a

decent learning experience also. I was originally worried that I might have trouble learning new concepts through an online course, but MathXL has made it pretty painless for me. Would definitely recommend, and use again in the future!

The Code in the book was expired - I eventually gave up trying to use it and just bought a code straight from Person's website. I will not be using to purchase any more items related to Access cards.

This was a requirement for my math course, the online interface at first is very difficult to get the hang of. However, once you figure out where everything is and how to manipulate it its a good experience. I was able to finish the entire semester worth of work before the midterm without it feeling excessive; which I think speaks volumes for this program. I like that I do not have to carry around a math textbook and I can access my homework from anywhere I have computer access. If you have the option to use this over a textbook, I would definitely recommend choosing this.

MathXL was required for my math class for the last two quarters I have been taking so I had to buy a access card and really did have the best price especially with the free shipping. From some of the other reviews I wasn't expecting much and in fact was pretty wary but I had to have this for class so I bought it anyways. When class started I was happy that the code worked but didn't really expect much from the program itself. Luckily though it has been great! Not only can I go at whatever pace I want (as long as I meet the deadlines) but the homework actually seems to help. I am currently finishing this quarter, with my final this week, nearly a month ahead which is great! It makes taking multiple classes easier as I just work ahead when there is less work in one of them so I have less to do when finals come around. If I have any trouble with the homework I just hit one of the options on the side like the "help me solve this" and it walks me through it. You also have as many chances as you need for the homework and can do them over again before a test if you want to as well just for review. The videos are the most helpful though although I think they may be different for each school. However it does have some downsides like as my teacher has referred to as the "math gods". The program can be very touchy but as long as you keep notes you can show them to your teacher and they'll adjust your points on quizzes/tests. There are other issues but the price is really the only thing I wish was less although I am glad I was able to get it separate from the book here so I can't complain too much.

Have found that has the best price on text books, new or used, and these access cards too, far lower than the local College book store. They arrive with in the week and are in good shape. If you need a standalone access card because you brought a used text book this is a good idea, be advised that once the access code is used once (with the new text book) it can not be used again with the then used text book. was not real clear on this when we started ordering used text books, best to also order and pay for a new user guide & access code if you will need it with the used text book. Need also to consider ordering new text book with usable access code depending on what may be least expensive.

Ordered the product for my college class. Received better than hoped for with a 12-month code. Sent email to vendor to verify functionality and received a reply within 10 minutes. Great response and got it in 8 days including a weekend. Thanks for fast ship.

I liked using this for my class the program has instruction tutorials that walk you through how to do each type of problem. You can also email your instructor about a specific problem through the website; I used this feature quite a bit.

Received this the day before my class started and it was a breeze to get registered. I was a little hesitant because I saw the reviews stating the code had expired but no such issues on my end. Plus not having to fork over 85 dollars to Pearsons is worth it.
