# Math Minutes, 5th Grade

## Synopsis

Each book in this series features 100 Minutes to help students build basic skills, increase speed in math operations, and strengthen problem-solving skills. Each Minute consists of 10 problems of varying degrees of difficulty that incorporate a variety of skills. Each ten-problem reproducible can be used as a learning or testing tool.

## Book Information

Age Range: 10 and up

Series: Math Minutes

Paperback: 112 pages

Publisher: Creative Teaching Press; Tch edition (March 27, 2002)

Language: English

ISBN-10: 1574718169

ISBN-13: 978-1574718164

Product Dimensions: 8.4 x 0.3 x 11.1 inches

Shipping Weight: 9.6 ounces (View shipping rates and policies)

Average Customer Review: 4.6 out of 5 stars [See all reviews](#) (40 customer reviews)

Best Sellers Rank: #35,606 in Books (See Top 100 in Books) #100 in [Books > Textbooks > Education > Elementary Education](#) #100 in [Books > Education & Teaching > Schools & Teaching > Instruction Methods > Mathematics](#) #163 in [Office Products > Educational Supplies > Early Childhood Education Materials](#)

## Customer Reviews

I'm a math intervention (remediation) teacher in a middle school in Massachusetts. Both my colleague and I used this 5th grade math minutes book to begin our 5th, 6th, and sometimes even 7th grade classes. Substitute teachers found it useful, too. Each one-page daily worksheet has a variety of math problems. Most students found some problems easy, some a little challenging, and usually at least one that they had to work to get. Highly recommended.

I'm so pleased with this book. We use it for homeschooling, but it would be fine for a brief afterschooling reinforcement. I'm sorry there is no "look inside" because the pages are of a nice font, enough room to work problems, and the pages aren't "busy" but are visually appealing. I like it because it is a completely different curriculum than we are using (US edition Singapore) and helps me see what USian kids are getting, it usually has 4 questions kiddo does immediately without a

thought, 4 or 5 he has to think a little over, and one we need to discuss. It also has shown him just how FAR he's come, and how MUCH math he really knows. That encouraged him. You see, most of math is constantly moving onto something new and unfamiliar, and can whack at the morale. I know it did when I was a kid. This encourages him. He does it without a fuss or comment while I'm at work, and then we go over it at the beginning of our school time.

I love this series. My daughter has done all of them so far (up to sixth grade). It only takes about 10 minutes a day but is well worth it for review and to discover areas that need improvement. I highly recommend this.

As a 5th grade teacher, I purchased Math Minutes to use as a warm up activity. It is an excellent review. I also use it for homework assignments. The format allows the students to quickly solve the problems using a variety of strategies.

These series of books have been a fabulous resource in my classroom. I do one math minute a day before I teach the main lesson for my students. It helps them keep up with what they have learned and what they will learn...great review opportunities!

It covers similar curriculum of most other 5th grade math books and is definitely a great supplement. HOWEVER, it lacks a significant number of algebraic questions that's covered in California's Standardized 5th grade test. Source:

<http://www.cde.ca.gov/ta/tg/sr/documents/rtqgr5math.pdf> With the exception of a few questions in the workbook, the vast majority of the product lacks basic algebra supplementation. Which, if you check out the copy of CDE, contains a significant number of questions on it. I've looked into other 5th grade workbooks and they all seem to lack a focus on half the advanced questions on the standardized test. Just something to note for customers trying to prep their kids for tests at the end of the year and not just supplement their education.

This is great for summer. It keeps the kids brains working till school is back in session! Easy to follow and keeps my grandsons

[interhttps://www..com/dp/1574718169/ref=cm\\_cr\\_ryp\\_prd\\_ttl\\_sol\\_10est!](https://www..com/dp/1574718169/ref=cm_cr_ryp_prd_ttl_sol_10est!)

Math Minutes are perfect to review a variety of skills and concepts on a daily basis. It is quick and

easy to use in the classroom. I teach Math Lab for 3rd, 4th, and 5th grades, and this is a great way to start each class.
