Get Into Graduate School

Synopsis

Everything a graduate school candidate needs to know for success! In 2009 more than one million people applied to graduate school, allowing schools to be more selective and creating fierce competition for valuable slots in the class roster. Get Into Graduate School leads the applicant through the entire admissions process, providing them with everything they need to know on how to get accepted. Unlike other graduate school guides that are simply a listing of graduate schools and programs, Get Into Graduate School is a comprehensive guide focusing on graduate school admissions strategies. This guide provides applicants with targeted strategies and expert advice from admissions professionals, including step-by-step guidance on how to find the right program, prepare a standout application, excel during the interview, and finance a graduate degree. Also included is helpful advice on planning for graduate school during college, such as which courses to take and which extracurricular activities to get involved in. Get Into Graduate School provides personalized information for all applicants including minorities, students with disabilities, older students, and international applicants.

Book Information

Series: Get Into Graduate School

Paperback: 312 pages

Publisher: Kaplan Publishing; 4th edition (March 29, 2011)

Language: English

ISBN-10: 1419550101

Customer Reviews

I happen to have read this book after finishing two graduate programs, one a Master's of Science in Engineering Management (a degree that is not mentioned in the course of this book),

and the other a Masterâ™s of Arts in Military History, but its information is useful for graduate students in a wide variety of fields seeking either Masterâ™s or Doctoral degrees. As can be expected, this book has a "catch-as-many-as-possible" approach in its topics, preferring to tackle the most popular fields of study and the most popular concerns that insecure would-be graduate students have, meaning that people with unconventional graduate school interests are likely to find less specifically about them, and people of normal backgrounds (i.e. non-disabled straight white males) are likely not to find a lot of information specifically about their graduate school experiences. Caveat lector. Nonetheless, the book is not completely useless, and indeed there is much information here that any graduate student in any program can learn from. Part One of the book introduces the reader to graduate programs "Chapter One looks at the goals of the reader (presumably a would-be graduate student), Chapter Two looks at finding information about graduate school programs, and Chapter Three looks at evaluating graduate school programs. Part Two covers the process of applying to graduate school "Chapter Four talks about the requirements of graduate programs, Chapter Five talks about preparing the application, Chapter Six talks about the ever-important personal statement, and Chapter Seven talks about what happens after you apply.
