Customer Reviews

From the book: "If the client feels he or she is a victim, or if he or she is a blamer with no awareness of personal responsibility at all for his or her experience, then helping the client to change in some meaningful way is more difficult." These days it is no longer accepted that people

can become a victim of other people. What used to be the victim, is now the perpetrator or at least jointly responsible. It is beyond me, how this view could become so dominating and absolute. Where is the objective differentiation? Yes, there are many surviving victims with no responsibility whatsoever for their tragic fate. How does an "active role" look like today, when society doesn't even acknowledge the victim as such and justice is outdated? The victim is forced to "understand", that he or she attracted the horrible fate and see the suffering as "justice", otherwise there will be no acceptance in society for the "victim". This is wicked.

Before buying it I thought it was expensive; tip to self, don't ever judge a book by its size! Great book and well worth it, really is the 'essentials of hypnosis'

Wonderful book! among all other literature on the subject of hypnosis it's good to read from a well educated professional! This book has met my expectations!
