ISBN-13: 978-0806963082

Product Dimensions: 9 x 6 x 0.4 inches

Shipping Weight: 8 ounces

Average Customer Review: 4.3 out of 5 stars [See all reviews](#) (21 customer reviews)

Best Sellers Rank: #409,522 in Books (See Top 100 in Books) #87 in [Books > Health, Fitness & Dieting > Nutrition > Macrobiotics](#) #149 in [Books > Health, Fitness & Dieting > Alternative Medicine > Chinese Medicine](#) #170 in [Books > Medical Books > Allied Health Professions > Diet Therapy](#)

Customer Reviews

The good: 1) some really useful information 2) simply written explanation of hot warm cool cold principals of food and who is suited best by which temperatures. He even has a chart. The bad: 1) There are a few chapters broken down according to whether the item is an herb, vegetable, fruit, grain, etc. There doesn't appear to be any logical or alphabetical order of the items within each chapter. 2) For each item listed, there is a food property description for what it remedies (for instance, asthma). Under the initial list of remedies the author proceeds to list basic recipes of combined ingredients for specific ailments. These may or may not be listed under the original heading. 3) If you look up an ailment in the index, you might find 3 entries referencing the ailment, when in fact there are probably 10 or so. They're just tucked away in one of the recipes. 4) Sometimes, he'll list a recipe, without indicating its use 5) no botanical names are given so you can't be sure if the yam he mentions is actually a yam or yucca. 6) he'll reference a clinical trial without specifics (quantity of solution and how it was taken, for how long, what improvement was seen, etc.) I really wanted to like this book, and I still try to refer to it as he has some really good remedies in here. However, I really can't recommend a book where I have to write in entries into the index so

that I can find some miraculous solution a week from now. His other book, "Chinese Herbs With Common Foods: Recipes for Health and Healing" received a better review, but only one person has reviewed it so far.

The good: this book has only 192 pages yet it has hundreds of food cures. it has chinese-medicine profiles of a large number of food items.the cures are really effective i have tried some my self. it has an effective cure for Hypoglycemia(low blood sugar) using an extremely common fruit everyday. I tried it with excellent results , I feel like superman!. it presents scientific experemints , citizen reports , medical knowledge , and personal experience and research.Also: This book gives a valuable working knowledge of chinese food effects and cures which is a major part pf chinese medicine.Food interaction is the first protocol of chinese medicine.So with this book you'll know a practical home based healing system with out needing to go to China or learn Chinese or going anyware because by just ordering this great book you'll learn alot of important info that will show its importance for a very long time in that you will constantly be referring to it.Remark:generally speaking , practitioners of an alternative medicine practice are more knowledgable of natural cures than MDs who research the field.The bad: of course this book cannot cover all known foods, you will find some common foods missing and this book has a large number of asian foods that arent common in some countries. some organization problems , sometimes the index does not show all possible cures , maybe there was a computer error in the printing , meaning that you might find a cure for a certain disease that wasn't listed under a food name.The Bottom line: buy this book now , try its remedies before you go to a hospital.

I read this book in one night. You would have thought I was reading a NYT #1 rated thriller or similar. I too found effective treatments not only for myself but for friends. Sorry to the author but I can't let my friends sit and suffer.I want to add a personal experience- I studied qigong and tai chi. during qigong i fractured my right foot. The good old V.A. (yup- the Veterans Administration) tried for two months to prescribe pain pills to reduce the swelling painful foot. Finally I told my master about my foot. He sold me a small bottle of dit da jow juice which as he said is NOT FDA approved. He instructed me to apply it to my foot with cotton balls and tape them in place for a few HOURS?? Better than that! I wiped the cotton balls across my foot and the swelling and pain were gone in...TWENTY MINUTES. I was able to gingerly put both my shoes on after hobbling across campus in 2 foot snow drifts for two months.Thats my testimony. This book is worth what you pay for it. Keep it handy. You might want to make a copy for when you wear out the pages.

I bought this book after a friend recommended it. The cures really do work. A friend of mine often gets headaches and he is immune to any type of medicine including OTC pain relievers. I gave him a remedy from this book and his headache was gone in 20 minutes! So far all of the cures we have tried worked. Unfortunately some of the items required are either very difficult to find or non-existent in the US. We went into Chinatown in San Francisco looking for black sugar and all we received were very weird stares.

A Chinese herbal designed for modern English speaking audiences. This book covers the Chinese philosophy of balance and motion, Yin and Yang. It is organized by food group, with the medicinals alphabetized by common English name within each food group section. A very useful book for natural healing and practice.
