## Customer Reviews

This is a great guide. I am about to go on my first A.T. section hike later this Spring and find the information that this provides to be instrumental and extremely helpful. Thanks to the ATC for putting this out! This guide contains shelter info, elevation graphs w/shelter & intersection names, maps of nearby towns with hostel/medical clinic/resupply info, parking advisories, wildlife advisories, and more.

A full journey from Georgia to Maine laid out much like a AAA travel guide. With elevation references and points of interest listed state by state, it is clear why this concise companion is so highly recommended. For a personal touch check out AWOL on the Appalachian Trail by David Miller. He includes a lot of unique 'human' aspects of the trail, providing more than a list of mileages, altitudes, and bunk houses. But, by no means, is a list of mileages, altitudes and bunkhouses without value. A must for any one who is serious about planning ahead, a necessity for long hikes.

Great trail guide....but I still like AWOL's Appalachian Trail Guide 201?They both compliment each other! Still use a PDF on phone instead of carrying around the extra weight of the books.....counting grams/ounces....go ultralight...go minimal....just go...instead of reading this get out and see this great country from a trail.

This is a TECHNICAL MANUAL , NOT a fun enjoyable book with pictures. If you're trying to decide whether or not to do the trail this would not be the book. This is the technical manual for someone on the trail or with a set plan to go on the trail in the next 30 days. No pictures or anything like that, Just simple illustrations and hard technical information.

Personally feel this is the better guide for the AT. Mine got rained on one night so I got the AWOL guide sent to me and though it seemed to be a little better about showing viewpoints and water sources on the trail this book has way more information on things when you get to town.

Exceptional. I have the 2013 Thru-Hikers Companion and was just expecting updates on off-trail accommodations such as restaurants, outfitters, shuttles, etc. but found that elevation profiles and parking facilities have been added. Excellent resource.

Great help planning my hike of the AT leaving in April NOBO hiker\_biker

Lacks directions to reach some of the gaps for Day Hikers
