## Customer Reviews

I would like to personally write a letter or send an email to Fred Pyrczak because he made learning statistics SUPER easy. I'm in a Master's degree program and I had to take a statistics exam to "test out" of taking the course since it had been three years since I took it in my undergrad. I was so nervous I wouldn't pass the exam and that I would have to push back my entire program just to fit in the stats course but I didn't thanks to this author!!! I tested out on my exam on my first try! He is so amazing. I mean, he gives you TONS of real life examples. There's no way you can not apply this to things going on in the world around you. TOTALLY TOTALLY TOTALLY GET THIS BOOK IF YOU NEED TO LEARN STATS!

I got this book for a class and it has served its purpose. The information is very basic and doesn't cover statistics necessary for most disciplines. If you are looking for an easy to understand statistics text book, this is it.

The price was appealing and the product came in excellent condition. The seller is a reliable source for consumers and students looking for a bargain. I may have been anxious however in expecting it to come within a week or so. It took the product a while before it arrived.

Many textbooks are so over the head of students, that we're lucky to grasp the facts and truly understand the subject matter. This book has been the exception to the rule and has been practical and direct in presenting a clear and precise path to understanding the subject.

I finally got to understand basics about statistics and choose the parametric test I need. It is excellent!!! It's better than having a teacher. It explains pretty well by itself.

I hated stats in college, and this was super easy to understand, with great review questions and easy to read material.

I was very impressed with the expedite delivery of the book. I had ordered the wrong book and discovered three weeks in the semester that I did not have the correct book. I immediately went to and ordered the correct book and I received the book within a week. As a result, I was able to catch up and receive a grade of B+.

These books whether used or new always come in perfect condition! I've used them countless times for my NP program and will use them thousands more!
