Customer Reviews

Architectural Drawing by hand is a fading art. In the age of computers and CAD, almost all architectural schools teach only CAD. As a professor of the American University of Mayonic Science and Technology, ([...]) teaching building architecture of Sthapatya Veda an Vastu Science and Vaastu Science and Technology to architects, interior designers, and lay persons, I require my students to hand draw during their first design classes. This book has been one of several that are a saving grace because so few books still focus on hand drawing.The author has put forth simple, straightforward instructions and examples that will help anyone involved in learning architectural or interior design drawing. It is a required text for my classes.

This book is a good buy for the money. It was mentioned above that the drawings were a bit rough and unprofessional. You need to understand the difference between Architectural Drafting (drawing) and Mechanical drafting. This is not a book on mechanical drafting.... It is a book to teach the basics of sketching an Architectural draft. This it does quite well. This is how an Architect drafts, on preliminary plans. Later comes the polished professional presentation plan, that's another book at a much steeper price.

I am using this book for a class I am teaching at a College Level, and I would love to have it as a

part of our cirrculum, It has everything that students need to learn about how to hand draft architecturally. Marica Gray did a great job with this book and should make many more,,,BRAVO

He loves to draw, now since I've introduced him to the architectural world, he is always asking me to purchase these types of books. They keep him so engaged. He some times would rather be reading and practicing in these books than watching tv or outside.

the book itself isn't bad. it is spiral bound and thinner than i thought it would be, but it did cover the basics of manual drafting and the exercises on line weights would be helpful to someone just starting out. i purchased it for my architectural detailing class hoping it would be a refresher and indeed it was.

Great as a reference for beginners. I recommend this forhigh school students but could be used for community colleges also.

Architectural Drafting: Procedures & Processes AutoCAD 2016 For Architectural Design: Floor Plans, Elevations, Printing, 3D Architectural Modeling, and Rendering Architectural Drafting and Design (Available Titles CourseMate) ISO 2859-4:2002, Sampling procedures for inspection by attributes - Part 4: Procedures for assessment of declared quality levels Office Procedures for the Legal Professional (Legal Office Procedures) Essential Clinical Procedures, 2e (Dehn, Essential Clinical Procedures) Lippincott's Nursing Procedures (Springhouse, Nursing Procedures) Roberts and Hedges' Clinical Procedures in Emergency Medicine, 6e (Roberts, Clinical Procedures in Emergency Medicine) Roberts and Hedges' Clinical Procedures in Emergency Medicine (Roberts, Clinical Procedures in Emergency Medicine) Learning and Memory: Basic Principles, Processes, and Procedures Architectural Commercial Design Using Autodesk Revit 2015 Architectural Design with SketchUp: Component-Based Modeling, Plugins, Rendering, and Scripting 3ds Max Design Architectural Visualization: For Intermediate Users Basic CAD for Interior Designers: AutoCAD, Architectural Desktop, and VIZ Render 2007 An Architectural Framework for Describing Supervisory Control and Data Acquisition (SCADA) Systems History of Architectural Conservation (CONSERVATION AND MUSEOLOGY) Architectural Lighting: Designing with Light and Space (Architecture Briefs) Architectural Lighting Let There Be Light: My Life Among Giants, Monarchs & Mobsters in the World of Architectural Lighting Victorian Architectural Details: Designs for Over 700 Stairs, Mantels, Doors, Windows, Cornices, Porches, and Other Decorative Elements (Dover
