We’ve all had those perfect moments when events that could never be predicted, let alone controlled, remarkably seem to guide us along our path. Carl Jung called this phenomena “synchronicity” – “a collaboration between persons and events that seems to enlist the cooperation of fate.” In this book, Joseph Jaworski argues that the right state of mind will make you the kind of person who can enlist the cooperation of fate and take advantage of synchronicity, creating the conditions for “predictable miracles.” If you are tired of being the victim of circumstances, this book will teach you to be the kind of person who creates your own circumstances. Jaworski shares the story of his own escape from an inauthentic life and his journey into a world filled with possibility. He maps out the inner path of leadership for those who feel the call to achieve their full potential, using his own life story to teach readers a greater truth. He examines the fundamental shifts of mind that free us to seek out the power of synchronicity. After reading this book, you will discover your own power to help those realities unfold. You will learn to “listen” to realities that want to emerge in this world and acquire the courage to help them be born. "Synchronicity illustrates that leadership is about the release of human possibilities, about enabling others to break free of limits – created organizationally or self-imposed. Although this book describes the author’s personal journey, it contains profound messages about organizational learning and effectiveness." – Scientific American

Customer Reviews

Synchronicity is one of the most inspiring books I know on leadership. The book is a fascinating and holistic blend of the personal and the professional. Jaworski is a name you may already be familiar with. He is the son of Watergate prosecutor, Leon Jaworski. His career is fascinating. He began his professional life as a high-powered attorney in Houston. He chased after and won all of the trappings of external success. Then, suddenly, his wife announced she was leaving him, and he was forced to confront himself, his values, and the meaning and purpose of his life. The rest seems to flow out of this pivotal experience. Jaworski left the practice of law and went on to become founder, chairman, and CEO of the American Leadership Forum. This organization continues to serve established local leaders and promotes collaborative problem-solving in communities and regions for the public good. In the early 90’s, he joined Royal Dutch Shell in London as head of Global Scenario Planning. The initiative he led there is credited as instrumental in the peaceful transfer of power in South Africa which put an end to the government of apartheid. At the time the book was published, Jaworski was with MIT’s Center for Organizational Learning which later closed in 1997. His role there was to work with leading corporations on building learning organizations, a topic which still receives considerable focus in leadership circles. It’s a concept that appeals to many, and yet few have succeeded in implementing one. The old models die hard. Still, change is in the air. The book speaks to topics that resonate with us at a deep level: integrity, commitment, responsibility, values, meaning, vulnerability, trust, collaboration, to name a few. The book begins with a familiar story.

Many books about leadership view the subject as being akin to mechanical engineering. How do you get all those people (like cogs in a machine) to act in just the ways you want them to? Mostly written by leaders to describe their own experiences or by writers to explain what leaders told them, these books are unsatisfying in the extreme. Take a look at Flawed Advice and the Management Trap by Chris Argyris to get a further perspective on this problem. This book is totally different, and quite appealing. Jaworski (son of Leon Jaworski, the famous special prosecutor of the Watergate
scandal) tells of his personal journey from being a successful corporate lawyer to becoming someone who works on making leadership better for all of us. Like most personal journeys, this one has low points (his wife falling in love with another man and telling Jaworski to move out that day, his father not telling him that he loved him, and the deaths of a child of each of his two sisters) and some high points (breakthrough meetings with great thinkers and stimulating helpful change). You could read the book for this, and you would have the rewards of a nicely done biography of someone who is working towards living an exemplary life. But there is more. Jaworski has accumulated some important insights into leadership that are well worth knowing. He makes an appealing case for servant leadership (the leader looks out for the group, rather than his self-interest). He also tells a fascinating tale of running the scenario development work at Royal Dutch Shell for 4 years. From this, he develops what seemed to me to be a profound insight: Scenarios can be used both to prepare for the future by helping us think through it in advance, and to create the future.
