# Using Google Docs In The Classroom (Grade 6-8)

## Synopsis

Google Docs is a free online software suite of word processing, spreadsheet, presentation, forms, and drawing programs. All files are stored by Google and are accessible from any computer that has Internet access. The format allows students to create, edit, share, and collaborate on documents with their peers in the classroom or at home. Discover how rewarding collaborative learning can be as you use this fantastic technological resource.

Shipping Weight: 8.8 ounces (View shipping rates and policies)

Average Customer Review: 4.0 out of 5 stars [See all reviews](#) (20 customer reviews)

Best Sellers Rank: #197,796 in Books (See Top 100 in Books) #106 in [Books > Education & Teaching > Schools & Teaching > Computers & Technology](#) #598 in [Office Products > Educational Supplies > Early Childhood Education Materials](#) #3750 in [Books > Education & Teaching > Schools & Teaching > Instruction Methods](#)

## Customer Reviews

Google is changing on a daily basis, so when I found changes - all I did was contact the publisher and they worked with me and updated the assignments - it was a WIN WIN for both of us - I will continue to purchase teacher created resources!

Excellent book with lessons for middle school students. I started using the book as soon as I got it and my students have enjoyed the lessons.

This has some very good ideas but get ready to modify the lessons with all the latest updates on Google. I ended up re typing the information and using the snipping tool to recreate the directions to coincide with the new formats. If you need ideas, it's great but it will require a bit more work.

Excellent for teachers that may be uncomfortable with google docs for education, or could be used as a self-tutorial for teachers. Unfortunately, google has changed a few minor features since this was published. I still recommend it.

I REALLY like the concept of this book but when is the updated version being released???? Many changes since 2012, which makes it a bit frustrating when teaching the lessons..confuses students.

If you know how Google technology works this is NOT the book for you. When I read the product description I understood the book to be a resource of ideas/activities. Instead, the book is guide of step by step directions, complete with computer screen shots, on how to build Google files (DOCS, SHEETS, FORMS, DRAWING and SLIDES). The book is user friendly but not at all the product I was hoping to add to my teacher resources as I move to a digital classroom.

I bought this product to help me create assignments and assessments for my student. It gives step by step guides with images and I found it very useful as I transform some of my lessons from last year.

Great! This will work well with our school. It will meet the needs of our students and faculty as required.
